THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

DATE MAILED: 11/16/2009

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 858 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 858 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this Examiner's Amendment was given in a telephone interview with Applicant's representative, Mr. Spencer K. Hunter on November 04th, 2009 on behalf of Mr. Gregory D. Caldwell (Reg. No. 39,926). During the telephone conference, Mr. Hunter has agreed and authorized the Examiner to amend Claims 49 and 93.

Claims

3. Replacing Claims 49 and 93 as following:
 - a. **Claim 49:** (Currently amended) A method in a Web service provider communicatively interfaced with a plurality of Web service clients, comprising:
obtaining a description of a Web service comprising protocol-independent business logic;
generating a Web service client proxy based, at least in part, on the description obtained, wherein the generated Web service client proxy comprises the protocol-independent business logic in an executable format and is extended with one or more client protocol implementations.

~~generating the Web service based on the description obtained, the generated Web service comprising the protocol-independent business logic in an executable format;~~

generating a first virtual interface to the Web service based on the description obtained, the first virtual interface comprising a mapping of the protocol-independent business logic of the Web service to a first transport protocol that provides a first Web service client access to the protocol-independent business logic of the Web service, and wherein the first Web service client comprises a Web service client authentication extension having a user selectable authentication protocol therein for specifying the authentication protocol to be implemented by ~~[[a]] the~~ Web service client proxy between the virtual interface and the first Web service client, without regenerating the Web service client proxy;

receiving and implementing the user specified authentication protocol without regenerating the Web service client proxy, wherein the user specified authentication protocol is received from the first Web service client via a logical port between the first Web service client and the Web service client proxy;

processing message traffic exchanged between the Web service client proxy and the first Web service client via the first virtual interface in accordance with the first transport protocol and the user specified authentication protocol implemented by the Web service client proxy;

generating a second virtual interface to the Web service based on the description obtained, the second virtual interface comprising a mapping of the protocol-independent business logic of the Web service to a second transport protocol different than the first transport protocol, wherein the second virtual interface to provide a second Web service client access to the protocol-independent business logic of the Web service without regenerating the Web service; and

processing message traffic exchanged between the Web service client proxy and the second Web service client via the second virtual interface in accordance with the second transport protocol, and in accordance with a second user selectable authentication protocol received and implemented without regenerating the Web service client proxy.

- b. **Claim 93:** (Currently amended) A computer-readable storage medium having instructions stored thereon that, when executed by a processor in a Web service provider, cause the Web server provider to execute a method comprising:

obtaining a description of a Web service comprising protocol-independent business logic;

generating a Web service client proxy based, at least in part, on the description obtained, wherein the generated Web service client proxy comprises the protocol-independent business logic in an executable format and is extended with one or more client protocol implementations.

~~generating the Web service based on the description obtained, the generated Web service comprising the protocol-independent business logic in an executable format;~~

generating a first virtual interface to the Web service based on the description obtained, the first virtual interface comprising a mapping of the protocol-independent business logic of the Web service to a first transport protocol that provides a first Web service client access to the protocol-independent business logic of the Web service, and wherein the first Web service client comprises a Web service client authentication extension having a user selectable authentication protocol therein for specifying the authentication protocol to be implemented by ~~[[a]]~~ the Web service client proxy between the virtual interface and the first Web service client, without regenerating the Web service client proxy;

receiving and implementing the user specified authentication protocol without regenerating the Web service client proxy, wherein the user specified authentication protocol is received from the first Web service client via a logical port between the first Web service client and the Web service client proxy;

processing message traffic exchanged between the Web service client proxy and the first Web service client via the first virtual interface in accordance with the first transport protocol and the user specified authentication protocol implemented by the Web service client proxy;

generating a second virtual interface to the Web service based on the description obtained, the second virtual interface comprising a mapping of the protocol-independent business logic of the Web service to a second transport protocol different than the first transport protocol, wherein the second virtual interface to provide a second Web service client access to the protocol-independent business logic of the Web service without regenerating the Web service; and

processing message traffic exchanged between the Web service client proxy and the second Web service client via the second virtual interface in accordance with the second transport protocol, and in accordance with a second user selectable authentication protocol received and implemented without regenerating the Web service client proxy.

4. **Claims 49, 51-52, 55-58, and 93-99 are allowed.**

Examiner's Statement of reason of Allowance

5. **The following is an examiner's statement of reasons for allowance:**

The present invention is directed to a method and program product for implementing web service client by generating a web service client proxy, which comprises Web service client authentication extension selectable by during implementation without re-generating the Web service client proxy.

The closest prior art, as previously recited, Chappell et al., (“Chappell,” “*Java Web Services*,” published by O’Reilly in March 2002) and Sun Microsystems, (“Sun,” “*Building Web Service - Sun™ ONE Studio 5 Programming Series*,” published by Sun Microsystems, Inc., in June 2003), are also generally directed to various aspects of implementing and generating web service client. However, none of Chappell and Sun teaches or suggests, alone or in combination, the particular combination of steps or elements as recited in the independent claims, claims 49 and 93. For example, none of the cited prior art teaches or suggest the steps of “*generating a Web service client proxy based on the description obtained, wherein the generated Web service client proxy comprises the protocol-independent business logic in an executable format and is extended with one or more client protocol implementations;*” “*generating a second virtual interface to the Web service based on the description obtained, the second virtual interface comprising a mapping of the protocol-independent business logic of the Web service to a second transport protocol different than the first transport protocol, wherein the second virtual interface to provide a second Web service client access to the protocol-independent business logic of the Web service without regenerating the Web service;*” and “*processing message traffic exchanged between the Web service client proxy and the second Web service client via the second virtual interface in accordance with the second transport protocol, and in accordance with a second user selectable authentication protocol received and implemented without regenerating the Web service client proxy.*” Therefore the claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
